

# **Hanergy Institute of Technology and Engineering (HITE)**

The Institute of Technology and Engineering was set up purposely to train its core Engineering Installers and Technicians to be able to provide efficient and professional installation services to Hanergy Oil clientele across the country.

Every technician or technical engineers must avail themselves of this training for certification before engaged to provide any related services. Training would be provided in all the regions of Ghana on specific dates and venues. Further information would be made available soon.

## **Vision**

To be a world-class technological and engineering institute recognized for excellence, innovation, and the societal relevance and impact of its pursuits.

## **Mission**

Our mission is to produce creative and technically strong engineers and to research pioneering solutions to global challenges. We do this with an unprecedented commitment to integrating across engineering, sciences, arts, business, and other disciplines to yield transformative results.

Certification Course available effective June 2016 includes:

- 1) Certified Installation Technicians and Engineering-This certificate is required before one could install Ultra Management Equipment and its offered in partnership with our partners in Republic of South Korea.
- 2) Certificate in IP Camera Installation offered in Partnership with our Institute in South Africa and Sweden.
- 3) Other various courses to be announced soon.
